

1, Types of mediums ?

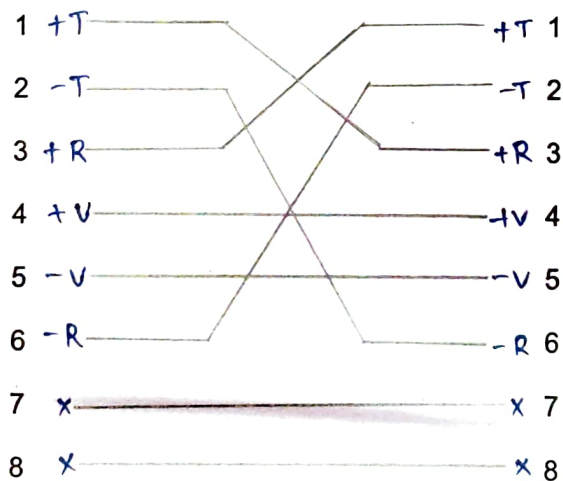

- (i) Radio frequency (wire less)
- (ii) Electrical signal (wired) [copper cable]
- (iii) Light signal (wired) [optical fiber cables]

2, Write down switch 8-pins ?

- 1 +R
- 2 -R
- 3 +T
- 4 +V
- 5 -V
- 6 -T
- 7 X
- 8 X

3, Connect utp cable between two devices

[cross cable] -> same function.

4, Explain AUTO MDIX ?

AUTO MDIX (Automatic medium dependent Interface crossover) is a feature of modern ethernet switches and network interfaces that automatically detects and configures the transmit and receive wire pairs, allowing them a straight through or crossover cable to be used without manual configuration.

5, Explain POE injector ?

POE Injector (Power over Ethernet Injector) is a device that combines electrical power and network data into a single Ethernet cable to power POE-enabled devices such as IP cameras, wireless access points, and VoIP phones, eliminating the need for a separate power supply.

6, Explain POE switch ?

A POE (Power over Ethernet) switch is a network switch that provides both data and electrical power through its ethernet ports. It powers POE-compatible device directly over the Ethernet cable.

7, Explain types of nic & function ?

*** Types of NIC:**

- (i) wired
- (ii) wireless

*** Function of NIC:**

It is used to convert binary signals to electrical & electrical signals to binary.
